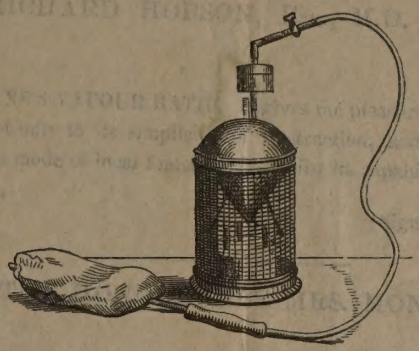
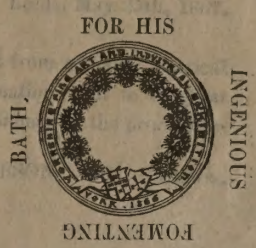
BOLLANS'S PATENT DOMESTIC

FOMENTING AND VAPOUR BATH.





A perfect Vapour Bath can be had for a cost of One Penny.

Retail Price, 35s., complete and packed in a Japann'd Box (not larger than an ordinary Hat Box,) with Lock.

One great advantage of this Bath over all others, is that it can be used as a fomenter in cases of Sprains, Bruises, Boils, Inflamations, Spasms, &c. The fomentation can be either plain or medicated; it can be applied for any length of time without either disturbing the Patient or changing the Fomenting Pad. The degree of heat can be regulated by means of a stop-cock; the steam can be generated in four minutes, without either fire or gas in the room. In severe and dangerous inflamations this instrument is invaluable, as the distress caused by the ordinary method of fomentation is *entirely* avoided, the Patient remaining absolutely still and completely covered as long as necessary.

As a Vapour Bath, it is the most complete ever offered. The vapour can be medicated if desired; steam can be generated in four minutes; the heat can be regulated by a stop-cock. It can be used with an ordinary cane-bottomed chair, or applied to a person in bed. Explosion is absolutely impossible. The great value of the Vapour Bath is too well known to need comment. The importance of a free-acting skin to the healthy, which the Vapour Bath produces and maintains, is now fully appreciated, and its value and soothing influence in many diseases is generally recognised.

No household should be without one, as it may often prove a ready and energetic agent in the hands of the family Physician in many cases of emergency.

To Travellers and Military Officers it is invaluable, as it can readily be used for cooking an omelette, or heating a Toddy Kettle.

A small Omelette Pan and Toddy Kettle are made to fit the apparatus, if required, and an extra charge made for them.

It can be used with equal facility for the purpose of disinfecting or perfuming an apartment. By pouring into the cone a small quantity of Eau de Cologne, or other good perfume, the atmosphere of the room will, in a few minutes, be filled with a most delicate and refreshing odour.

☞ *Full Directions for application with each Bath.*

To be had of all Chemists, or from the Patentee, R. H. BOLLANS, Petergate, York.

TESTIMONIALS.

We are permitted to Publish the following Testimonials, taken from a large number recently received, but which we have not space for:—

From RICHARD HOBSON, Esq., M.D. CANTAB.

Leeds, May 25th, 1857.

DEAR SIR,

You ask my opinion of BOLLAND'S VAPOUR BATH? It gives me pleasure to say that from actually Practical experience, I can bear Testimony, not only to its simplicity of construction, and easy application; but to its great efficiency when carefully used in the mode of local fomentation, whilst its capability and economy in the production of Vapour should not be overlooked.

To Messrs. HARVEY & REYNOLDS. (Signed) R. HOBSON, M.D., CANTAB.

From THE HONOURABLE MRS. MONSON.

Kirby Underdale,

May 21, 1857.

Mrs. Monson has used the Vapour Bath several times for fomenting, and finds it a most excellent invention.

To Mr. BOLLAND.

From J. T. LEE, Esq., GROVE HALL, KNOTTINGLY.

Grove Hall, Knottingly,

April 17, 1857.

SIR,

I feel obliged for the information yo sent me. I tried the Vapour Bath yesterday, and am quite satisfied with the result; it seems to me very efficient in every way. I send you Post Office Order for 35s.

To Mr. BOLLAND. (Signed) J. T. LEE.

From Mr. STAPYLTON, of BYLAND ABBEY.

Byland Abbey,

May 14, 1857.

Mr. BOLLAND.

I have tried your Vapour Bath, and find it to answer in every way, with very little trouble, and certainly think that no family ought to be without one, especially in the country.

(Signed) M. STAPYLTON.

North Parade, Otley,

May 22, 1857.

SIR,

Having used your "Patent Fomenting and Vapour Bath," I have great pleasure in saying that I am perfectly satisfied with it, and find it well adapted for the purpose intended, as a ready means of giving a bath at home, or of fomenting. I consider it a very compact and efficient apparatus, and confidently recommend it.

To Mr. BOLLAND. (Signed) ISAAC CARR.

Railway-Street, York,

February 6th, 1858.

SIR,

Having used your Patent Fomenter (in the case of a severe crush to the shoulder) I can, with Confidence, speak of its great value for fomenting purposes, and the comfort and cleanliness in its use.

To Mr. BOLLAND. (Signed) M. COOPER.
